I love to eat waffle especially when the waffle just comes out hot from waffle maker and waffle with peanut butter is always my first choice. I have even tried to make my own waffle with my sister in law's waffle maker which bought from Cosway. [My homemade waffle](#) didn't turn out as good as those sell outside. To me, good waffle should be crunchy outside and soft inside. Of course the taste should be delicious too.

Recently, I get to know about Belgium Waffle after my first try in Osaka Railway Station, Japan. The strong fragrance from the waffle store caught our attention. We bought a piece of plain waffle which costs 126 yen (about RM4.50). The Belgium waffle was very crunchy and tasted heavenly! 🍩
