Recently when we were doing house keeping, we found out that there is a unit of steamer given by Camus's mom. She bought it from Cosway many years ago but did not use it at all. We took it out from our store room and keep it at kitchen.

Last two weeks, we used it to cook for our lunch and dinner. We found it quite useful and easy to use without dirty our kitchen, hence not much cleaning job after cook except for washing the steamer part by part after use.

We first try with steam chicken with mushroom, the night before cook, we merinate two big chicken drumsticks with oyster sauce, soy sauce and pepper. To make the chicken more delicious, we added dried mushroom, red dates and ginger to the chicken on the day we cooked. Since the steamer contains three layers, we put in lady finger and corn too.
