Humans always like to be smart. I am also a human, so always do things smartly. With my first Smart oven, followed by Smart bread maker, Smart phone and ...Smart ME... *****shy*****, now I have another one with me, Smart soy milk maker!

This so-called Joyoung brand that we bought is China's popular brand and made in China. It can blend and cook soy beans. Not only soy milk, it can cook soup, porridge, ten-grain rice, blend fruit juice and others.

They have many different versions of soy milk maker available, we chose the stainless steel one with model DJ14B-D06D. This unit came with an easy clean function where you can press a "Easy Clean" button and it will help you clean up the machine.
